NOTE 1: The company where the delivery receipt was generated.

NOTE 2: The division where the delivery receipt was created.

NOTE 3: The branch where the delivery receipt was generated.

NOTE 4: The receipt number that is assigned to a delivery.

NOTE 5: This field is used to keep track of how many times a delivery receipt has been printed. It increments every time a print is requested.

NOTE 6: The vendor/trucker company that will be carrying the delivery. This is only required for certain types of deliveries.

NOTE 7: The flag that identifies whether the receipt is inbound or outbound.

NOTE 8: The branch that the item is being shipped from, if applicable.

- NOTE 1: Cannot be blank
The description of the miscellaneous charge/credit. This must be unique for each record on file.
- NOTE 2: The amount of the miscellaneous charge/credit.
May be left as 0 when the record is created, but once it is added to an invoice segment, the amount must be filled in. If filled in, the amount will not be changeable once added to a transaction.
- NOTE 3: Must be Y or N
A flag to indicate whether tax 1 applies to the miscellaneous charge/credit. If set to "Y", tax 1 will be calculated on this item when it is added onto a transaction, if the customer is taxable.
- NOTE 4: Must be Y or N
A flag to indicate whether tax 2 applies to the miscellaneous charge/credit. If set to "Y", tax 2 will be calculated on this item when it is added onto a transaction, if the customer is taxable.
- NOTE 5: Must be Y or N
A flag to indicate whether discount applies to the miscellaneous charge/credit. If set to "Y", discount will be calculated on this item when it is added to an invoice segment, if the customer gets a discount.
- NOTE 6: Cannot be 0
The minimum or default quantity that can be keyed for a miscellaneous charge/credit once it is added onto a transaction. If no quantity is input when the item is being added to a segment, this quantity will get brought in automatically.
- NOTE 7: Cannot be 0
The maximum quantity that can be keyed for a miscellaneous charge/credit

NOTE 1: Valid types are L - equipment line
M - miscellaneous charge
P - additional part
T - trade in
V - custom acctg G/L entry

NOTE 2: Contains first 10 characters of part number if type P record, last 10 of miscellaneous charge/credit description if type M record or actual equipment stock # if type L record

NOTE 3: The extended amount for the sale item.

NOTE 4: Possible values are 2 - cash, an A/R Agency code, "?" to denote an a/r account found in an internal list of a/r accounts, or "!" to denote an a/r account not found in the internal list.

NOTE 5: Contains A/R acc for type L record, or overallowance acc (if one exists) for type T record

NOTE 6: Contains A/R Cost Ctr for type L record, or overallowance Cost Ctr (if one exists) for type T record

NOTE 7: The sale account for the line item. Only valid for type L, V and M records

NOTE 8: The sale cost center for the item. Only valid for type L, V and M records.

NOTE 9: Inventory account - only valid for type L and T records

NOTE 10: Inventory account cost center - only valid for type L and T records

NOTE 11: Only valid for type L record, but may be blank - not a mandatory field unless there is a depreciation account or automatic costing is being used

NOTE 12: Only valid for type L record, but may be blank - not a mandatory field unless there is a depreciation account or automatic costing is being used

NOTE 13: The depreciation account for the sale unit. Only valid for type L record, and is required only if equipment has depreciation amount

NOTE 14: The depreciation cost center for the sale unit. Only valid for type L record, and is required only if equipment has depreciation amount

NOTE 15: Contains overallowance amount for type T records, (if overallowance exists), first 15 characters of first line of description for type L records, part description for type P records, or first 15 characters of miscellaneous charge/

NOTE 1: A-Active D-Deleted

NOTE: A PART# CAN BE CHANGED TO STATUS "D" ONLY IF THE ON HAND QUANTITY, QUANTITY ON ORDER AND QUANTITY BACK ORDERED ARE EQUAL TO ZERO. DELETED PARTS ARE NOT REMOVED FROM THE PART MASTER (THEY MUST BE REMOVED USING THE DELETION LISTING)

NOTE 2: May contain four pricing level percentages - S9(2)V99 in the first 16 positions
eg. 1000 would mean 10% off list
100} would mean 10% above list

NOTE 3: Must be order from vendor in multiple of this quantity.

NOTE 4: The (net) on hand quantity is calculated as PMOH - PMQA - PMQR

NOTE 5: Blank or 'L' means percentage applied to list price.
'N' means percentage applied to net price.

NOTE 6: Y-Yes N-No

NOTE 7: Y-Yes N-No

NOTE 8: Y-Yes N-No

NOTE 1: The transaction number assigned to the rental contract.

NOTE 2: This is the type indicator for the rental transaction. Each type, except for reservations and requests, also has its own corresponding "held" version of the the type code that will show up when the active type value is searched for.
Request : REQ
Reservation : RES
Regular Rental : RNT/HLD
Rent-to-Purchase : RTP/HLT
Cycle Rent : RTC/HLC
Demo Rental : DEM/HLM
Loaner Rental : LOA/HLL

NOTE 3: This is the status indicator for the rental contract. Contracts can start as R (Request/Reservation) and progress to C (Contract), I (Invoiced) after invoice(s) have been generated, and F (Finished) when all items have been returned. D indicates Deleted.

NOTE 4: This is the customer number associated with the rental contract. While creating or changing a contract, or while in the main list screen, you may search through existing customers on file by pressing <F4> with the cursor positioned on this field, when it is available.

NOTE 5: This is the salesman code that is associated with the rental contract.

NOTE 6: This is a purchase order number field that may be used on the contract if required.

NOTE 7: This is the discount amount for the contract.

NOTE 8: This is the overtime amount for the contract.

NOTE 9: This is the insurance amount for the contract.

NOTE 10: This is the subtotal of contract items, not including tax, discount, etc.

NOTE 11: This is the net amount of the contract, after tax, discount, etc.

NOTE 1: A-Active D-Deleted

NOTE 2: Y-Yes N-No

NOTE 3: Y-Yes N-No

NOTE 4: blank or 'M' (part not on part master)
E-Error on line after fast add

NOTE 5: Blank - Stocked Sale T - Transfer
N - Non Stock Sale A - One Time Sale
S - Special Order M - Branch Transfer Non Stocked
X - No Charge O - Branch Transfer Stocked

NOTE 6: blank - Total issued = 0
N - Total issued not = 0 or is a comment
Y - Already updated in W/O totals
\$ - P/O receipted twice - once with one then do EDT so gets set to Y, then receipt again so sees Y already so it sets to \$ - must redo all totals
P - Partial receipt of a purchase order

NOTE 7: blank - Not yet processed by S/O billing run or a W/O billing run (old costing)
I - Processed by a S/O billing run before a W/O billing run
W - Processed by a W/O billing run before a S/O billing run
If processed by S/O or W/O billing run, can not change the line as costing already done for all the other billing runs and they must match (like UPD field).

NOTE 8: Y-Yes N-No

NOTE 9: ' ' - not a inter branch transfer

Field	Description	Name	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
-------	-------------	------	------	-----	-----	-------	-----	-----	-----	-----	-----

'Y' - is an inter branch transfer

NOTE 10: ' ' (blank) - No picking status

- H - Half Picked, when using Wireless Inventory Order Picking system.
When a user partially picks parts on a ticket so the ship quantity is not fully picked
- P - Picked, when using Wireless Inventory Order Picking system.
When a user picks all of the parts on a ticket so the all parts with a ship quantity are fully picked
- R - Ready to pick. A user has taken the option from the picpak on a parts invoice to have the order picked through the Wireless Inventory Order picking system

NOTE 1: A-Active D-Deleted

NOTE 2: The day and number of months to be used to calculate the payment date.
 payment date.
 eg. If 15 is entered in the day and 1 is entered in the months field, the
 payment date will default to the 15th day of next month (invoice month + 1).
 Invoice date: 02132010
 Calculated due date: 03152010
 NOTE: If the days and day & months fields are both filled in, the system will
 do both calculations.

NOTE 3: '?' in last position means this is a miscellaneous vendor.
 The name, address and postal/zip code for the accounts payable
 vendor (A/P STATUS = "A"). Entering a "?" in the last position
 of the name field denotes that this is a miscellaneous vendor.
 NOTE: If a miscellaneous vendor is used to key vouchers, the
 operator will be required to enter the name & address.

NOTE 4: Y-Yes N-No

NOTE 5: Y-Yes N-No

NOTE 6: Could be blank for Canadian, A for American or any other codes as set up in the
 Currency table (Configuration-General Ledger-Accounts Payable).

This tells the system that when this vendor is used, the amounts entered on the
 key A/P vouchers screen are that of the currency (code) loaded in here.

Field Description	Name	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
-------------------	------	------	-----	-----	-------	-----	-----	-----	-----	-----

Vendor Name	Vendor Number	Search Key
Hiper Company	HIP01	HIPER
Leisure Travel	LEI01	LEISU
Sea By Sea	SEA01	SEA
Parts Depot Ltd.	PAR01	PARTS
Weston Union	WES01	WESTO
Reeford Products	REE01	REEFO

NOTE 1: A-Active D-Deleted

NOTE: A PART# CAN BE CHANGED TO STATUS "D" ONLY IF THE ON HAND QUANTITY, QUANTITY ON ORDER AND QUANTITY BACK ORDERED ARE EQUAL TO ZERO. DELETED PARTS ARE NOT REMOVED FROM THE PART MASTER (THEY MUST BE REMOVED USING THE DELETION LISTING)

NOTE 2: May contain four pricing level percentages - S9(2)V99 in the first 16 positions
eg. 1000 would mean 10% off list
100} would mean 10% above list

NOTE 3: Must be order from vendor in multiple of this quantity.

NOTE 4: The (net) on hand quantity is calculated as PMOH - PMQA - PMQR

NOTE 5: Blank or 'L' means percentage applied to list price.
'N' means percentage applied to net price.

NOTE 6: Y-Yes N-No

NOTE 7: Y-Yes N-No

NOTE 8: Y-Yes N-No

NOTE 9: Y-Yes N-No

NOTE 10: See ASLData.SFTYP

NOTE 11: M-Manual A-Automatic

Field	Description	Name	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
-------	-------------	------	------	-----	-----	-------	-----	-----	-----	-----	-----

NOTE 12: Valid codes: F, S, Z, and N as defined in transfer parameters table.

NOTE 13: C-Change to any fields related to the OFC calculations-OFC code,SS,Lead Time...
G-Group file maintenance
R-Credit inventory adjustment
S-Sale
T-Subs maint transfer of sales history
Blank-No change since last stock order

NOTE 14: Used for JDPRISM

NOTE 15: Used for Vermeer Dealer Inventory

NOTE 16: Used for Price File Extract

NOTE 17: Date of last run that produced this part regardless of whether part was ordered or not.

NOTE 1: There are 3 values currently used in this field.
M-parts management record all sources and types
T-critical code management record
S-source of supply management record

NOTE 2: if the cash code is \$ then the following codes in the NSC code mean
\$ = inv value for all parts
A = inv value for parts with no receipts last 12 months
C = inv value of obs parts sold this month
O = inv value obsolete parts
S = obs YTD sales
Z = inv value parts with zero sales last 12 months

if the cash code is not \$ then the following codes in the NSC code mean
blank = sales from inventory
N = special ordered from vendor non stock parts sales
S = special ordered from vendor stocked parts sales
M = special ordered from branch non stocked part sales
O = special ordered from branch stocked parts sales
T = transfers to another branch

NOTE 1: A-Active D-Deleted

NOTE: A PART# CAN BE CHANGED TO STATUS "D" ONLY IF THE ON HAND QUANTITY, QUANTITY ON ORDER AND QUANTITY BACK ORDERED ARE EQUAL TO ZERO. DELETED PARTS ARE NOT REMOVED FROM THE PART MASTER (THEY MUST BE REMOVED USING THE DELETION LISTING)

NOTE 2: May contain four pricing level percentages - S9(2)V99 in the first 16 positions
eg. 1000 would mean 10% off list
100} would mean 10% above list

NOTE 3: Must be order from vendor in multiple of this quantity.

NOTE 4: The (net) on hand quantity is calculated as PMOH - PMQA - PMQR

NOTE 5: Blank or 'L' means percentage applied to list price.
'N' means percentage applied to net price.

NOTE 6: Y-Yes N-No

NOTE 7: Y-Yes N-No

NOTE 8: Y-Yes N-No

NOTE 9: Y-Yes N-No

NOTE 1: P.M. Schedule's Period is a numeric field that can contain max of 6 digits. It specifies the period for the P.M. to be performed.
Example: 20 would represent twenty hours/days/weeks/months.

NOTE 2: P.M. Schedule's Code that represents a measure of time.
Valid values are: H - Hours
D - Days
W - Weeks
M - Months

Field	Description	Name	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
-------	-------------	------	------	-----	-----	-------	-----	-----	-----	-----	-----

NOTE 1: A-Active D-Deleted

NOTE 2: The day and number of months to be used to calculate the payment date.
 payment date.
 eg. If 15 is entered in the day and 1 is entered in the months field, the
 payment date will default to the 15th day of next month (invoice month + 1).
 Invoice date: 02132010
 Calculated due date: 03152010
 NOTE: If the days and day & months fields are both filled in, the system will
 do both calculations.

NOTE 3: '?' in last position means this is a miscellaneous vendor.
 The name, address and postal/zip code for the accounts payable
 vendor (A/P STATUS = "A"). Entering a "?" in the last position
 of the name field denotes that this is a miscellaneous vendor.
 NOTE: If a miscellaneous vendor is used to key vouchers, the
 operator will be required to enter the name & address.

NOTE 4: Y-Yes N-No

NOTE 5: Y-Yes N-No

NOTE 6: Could be blank for Canadian, A for American or any other codes as set up in the
 Currency table (Configuration-General Ledger-Accounts Payable).
 This tells the system that when this vendor is used, the amounts entered on the
 key A/P vouchers screen are that of the currency (code) loaded in here.

NOTE 7: "A" - the vendor is valid for the parts system.
 "D" - the vendor is NOT valid for the parts system.

NOTE 8: The first part of the name, address & postal/zip code for the parts supplier
 (PARTS STATUS = "A"). This is only required if the address is different than
 the accounts payable name & address.

NOTE 9: The day and number of months to be used to calculate the payment date.
 payment date.
 eg. If 15 is entered in the day and 1 is entered in the months field, the
 payment date will default to the 15th day of next month (invoice month + 1).
 Invoice date: 02132010
 Calculated due date: 03152010
 NOTE: If the days and day & months fields are both filled in, the system will
 do both calculations.

NOTE 10: 'Y' if this is to be identified as a multi line vendor.
 'N' if this is NOT to be identified as a multi line.
 NOTE: If a vendor is identified as a multi line, this will allow any parts
 (regardless of the vendor of the part) to be ordered through the PFW parts
 orders system with this vendor #.

NOTE 11: If left blank, the system will default to the first bank account set up in the
 SPECACCT table when keying vouchers for this vendor. A bank account other than
 the system defaults can be used.

Field	Description	Name	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
-------	-------------	------	------	-----	-----	-------	-----	-----	-----	-----	-----

NOTE 12: If left blank the system will default to the first payables account set up in the table SPECACCT when keying vouchers for this vendor. A payables account other than the default may be used if it is first specified as an Alternate Account in the table SPECACCT.

NOTE 13: If left blank, the system will default to the first discount account set up in the table SPECACCT when keying vouchers for this vendor. An account other than the default may be used if it is first specified as an Alternate Account in the table SPECACCT.

NOTE 14: The default payment days to be added to the invoice date in order to calculate the due date.
eg. If 10 is entered here, the due date on the KEY VOUCHERS screen will default to the invoice date plus 10 days.

Invoice date: 02132010
Calculated due date: 02232010

NOTE: If the days and day & months fields are both filled in, the system will do both calculations.

NOTE 15: The customer# to be used if payables are posted to the receivables account for this vendor.

NOTE 16: The search key is normally the first five characters of a vendor's name. This is a cross reference used to access the vendor account. If the name is less than five characters in length, the remainder of the search key is left blank.

The following illustrates sample VEN# and SEARCH key formats.

Vendor Name	Vendor Number	Search Key
Hiper Company	HIP01	HIPER
Leisure Travel	LEI01	LEISU
Sea By Sea	SEA01	SEA
Parts Depot Ltd.	PAR01	PARTS
Weston Union	WES01	WESTO
Reeford Products	REE01	REEFO
Bay Trustco	BAY01	BAY

NOTE 17: The tax number or equivalent (Dunn & Bradstreet) applicable to the vendor.

NOTE 18: 1099 Code: Consists of one of four alphanumeric values. These values determine where the amount will be printed on the 1099 form.

N - No Do not print the 1099 form
R - Rents
O - Other Income
C - Non-employee Compensation

Note -If the amount being placed in this field is less than \$600, then the amount will not appear on the 1099 form.

NOTE 19: The maximum decrease sales factor used when ordering.

NOTE 20: The maximum increase/decrease sales factor used when ordering.

NOTE 1: The transaction number assigned to the rental contract.

NOTE 2: This is the type indicator for the rental transaction. Each type, except for reservations and requests, also has its own corresponding "held" version of the the type code that will show up when the active type value is searched for.
Request : REQ
Reservation : RES
Regular Rental : RNT/HLD
Rent-to-Purchase : RTP/HLT
Cycle Rent : RTC/HLC
Demo Rental : DEM/HLM
Loaner Rental : LOA/HLL

NOTE 3: This is the status indicator for the rental contract. Contracts can start as R (Request/Reservation) and progress to C (Contract), I (Invoiced) after invoice(s) have been generated, and F (Finished) when all items have been returned. D indicates Deleted.

NOTE 4: This is the customer number associated with the rental contract. While creating or changing a contract, or while in the main list screen, you may search through existing customers on file by pressing <F4> with the cursor positioned on this field, when it is available.

NOTE 5: This is the salesman code that is associated with the rental contract.

NOTE 6: This is a purchase order number field that may be used on the contract if required.

NOTE 7: This is the discount amount for the contract.

NOTE 8: This is the overtime amount for the contract.

NOTE 9: This is the insurance amount for the contract.

NOTE 10: This is the subtotal of contract items, not including tax, discount, etc.

NOTE 11: This is the net amount of the contract, after tax, discount, etc.

NOTE 12: The cash or charge code for the contract. If the customer is cash only, it will be 2 for cash, otherwise it will be set to a default value based on what the customer is set up for.

- NOTE 1: This is used to denote the next transaction number the system should use when creating a new contract.
- NOTE 2: This is used to indicate where you wish the system to display the rental rates for the contract items. "S" indicates only on the screen, "P" means only on the printouts, "B" will do both screen and printouts and "N" means neither.
- NOTE 3: This is used to indicate whether you wish the system to print the covering dates on the invoices that are produced. Valid values are "Y" or "N".
- NOTE 4: This is used to indicate whether you wish to allow overbooking of rental items. Set to "Y" to allow, "N" to disallow or "C" allow overbooking on everything but rental contracts. "C" will allow the rental unit to be on a workorder or SAM agreement without conflicting.
- NOTE 5: This is used to indicate which billing method you wish to use. Currently, the allowable values are "5" for optimized pre-billing, "4" for optimized post-billing, "3" for no optimization at all, "2" for limited optimization (on quantity only) and "1" for regular billing.
- NOTE 6: This is used to indicate whether you wish to allow overrides of rental rates during contract maintenance. Set to "Y" to allow, "N" to disallow, or "A" to allow with authorization.
- NOTE 7: This is used to indicate what discount code on your system corresponds to a "no discount" value. This code is used during internal system processing of rental items.
- NOTE 8: This is used to indicate what tax 1 code on your system corresponds to a "no tax" value. This code is used during internal system processing of rental

NOTE 1: This is the actual 2 character code that is assigned to the duration. Note that the code "DM" is reserved for use as a "damage" duration, and should not be used for anything else, as it will not be put through optimization. A "DM" duration may be used to post damage charges to the same rental G/L account that the rental items post to. This would not be possible to do if the "damage" item was keyed through miscellaneous charges maintenance.

NOTE 2: This is the description of the duration code. This description will appear throughout various aspects of the rental system.

NOTE 3: This is the minimum hours that the duration can contain. This amount is used in various billing calculations.

NOTE 4: This is the maximum hours that the duration can contain. This amount is used for various billing calculations. If you wish to allow a grace period over and above the actual number of hours in the duration, you could do so here by making the maximum hours greater than the minimum. For example, on a daily duration, the minimum could be 24, and the maximum 25, so that if an item was returned up to an hour late, no extra charge would be levied.

NOTE 5: This is the maximum hours that the rented machine can be used for the duration in question. This amount is used to calculate if an overtime charge should be levied for the machine usage.

NOTE 6: This is used to indicate the functionality of the duration.
Y - display and be available for normal use. Optimizes during rental billing.
N - does not display for normal use, but can be used if desired.
S - indicates a static duration code that will not optimize to a larger duration during normal billing cycles, but can increase in rental quantity.
F - indicates a fixed duration. Rental lines using this duration will not roll upwards in duration or quantity - they stay as keyed.
U - indicates this is an hourly usage duration that does not optimize during billing. The rental item's quantity will change when hour readings are input.

fully picked

P - Picked, when using Wireless Inventory Order Picking system.
When a user picks all of the parts on a ticket so the all parts with a
ship quantity are fully picked

R - Ready to pick. A user has taken the option from the picpak on a parts
invoice to have the order picked through the Wireless Inventory Order
picking system

NOTE 1: If the evaluation/inspection is been placed into history (file UEEH field UESTA = "H") and the UJTID not equal zeros (meaning a work order was created for the step), then the UJLID field contains the TID of the Work Order.

If the evaluation/inspection has nto been placed into history (file UEEH field UETSA not equal to "H") and the UJTID not equal to zeros (meaning a work order was created for the step), the the UJLID field contains an LID that matches to the LID field in the WOR (work order repair) file on the specific segment that it relates to.

NOTE 1: A-Active D-Deleted

NOTE 2: The day and number of months to be used to calculate the payment date.
 payment date.
 eg. If 15 is entered in the day and 1 is entered in the months field, the
 payment date will default to the 15th day of next month (invoice month + 1).
 Invoice date: 02132010
 Calculated due date: 03152010
 NOTE: If the days and day & months fields are both filled in, the system will
 do both calculations.

NOTE 3: '?' in last position means this is a miscellaneous vendor.
 The name, address and postal/zip code for the accounts payable
 vendor (A/P STATUS = "A"). Entering a "?" in the last position
 of the name field denotes that this is a miscellaneous vendor.
 NOTE: If a miscellaneous vendor is used to key vouchers, the
 operator will be required to enter the name & address.

NOTE 4: Y-Yes N-No

NOTE 5: Y-Yes N-No

NOTE 6: Could be blank for Canadian, A for American or any other codes as set up in the
 Currency table (Configuration-General Ledger-Accounts Payable).

This tells the system that when this vendor is used, the amounts entered on the
 key A/P vouchers screen are that of the currency (code) loaded in here.

NOTE 7: "A" - the vendor is valid for the parts system.
 "D" - the vendor is NOT valid for the parts system.

NOTE 8: The first part of the name, address & postal/zip code for the parts supplier

Field	Description	Name	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
-------	-------------	------	------	-----	-----	-------	-----	-----	-----	-----	-----

(PARTS STATUS = "A"). This is only required if the address is different than the accounts payable name & address.

- NOTE 9: The day and number of months to be used to calculate the payment date.
 payment date.
 eg. If 15 is entered in the day and 1 is entered in the months field, the payment date will default to the 15th day of next month (invoice month + 1).
 Invoice date: 02132010
 Calculated due date: 03152010
 NOTE: If the days and day & months fields are both filled in, the system will do both calculations.
- NOTE 10: 'Y' if this is to be identified as a multi line vendor.
 'N' if this is NOT to be identified as a multi line.
 NOTE: If a vendor is identified as a multi line, this will allow any parts (regardless of the vendor of the part) to be ordered through the PFW parts orders system with this vendor #.
- NOTE 11: If left blank, the system will default to the first bank account set up in the SPECACCT table when keying vouchers for this vendor. A bank account other than the system defaults can be used.
- NOTE 12: If left blank the system will default to the first payables account set up in the table SPECACCT when keying vouchers for this vendor.
 A payables account other than the default may be used if it is first specified as an Alternate Account in the table SPECACCT.
- NOTE 13: If left blank, the system will default to the first discount account set up in the table SPECACCT when keying vouchers for this vendor.
 An account other than the default may be used if it is first specified as an Alternate Account in the table SPECACCT.
- NOTE 14: The default payment days to be added to the invoice date in order to calculate the due date.
 eg. If 10 is entered here, the due date on the KEY VOUCHERS screen will default to the invoice date plus 10 days.
 Invoice date: 02132010
 Calculated due date: 02232010
 NOTE: If the days and day & months fields are both filled in, the system will do both calculations.
- NOTE 15: The customer# to be used if payables are posted to the receivables account for this vendor.
- NOTE 16: The search key is normally the first five characters of a vendor's name. This is a cross reference used to access the vendor account. If the name is less than five characters in length, the remainder of the search key is left blank.

The following illustrates sample VEN# and SEARCH key formats.

Vendor Name	Vendor Number	Search Key
Hiper Company	HIP01	HIPER
Leisure Travel	LEI01	LEISU
Sea By Sea	SEA01	SEA

Field Description	Name	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
Parts Depot Ltd.	PAR01	PARTS								
Weston Union	WES01	WESTO								
Reeford Products	REE01	REEFO								
Bay Trustco	BAY01	BAY								

NOTE 17: Y-Yes N-No

NOTE 18: The tax number or equivalent (Dunn & Bradstreet) applicable to the vendor.

NOTE 19: 1099 Code: Consists of one of four alphanumeric values. These values determine where the amount will be printed on the 1099 form.

N - No Do not print the 1099 form

R - Rents

O - Other Income

C - Non-employee Compensation

Note -If the amount being placed in this field is less than \$600, then the amount will not appear on the 1099 form.

NOTE 20: The maximum decrease sales factor used when ordering.

NOTE 21: The maximum increase/decrease sales factor used when ordering.

NOTE 1: This is the number that is assigned to a service or parts quote.

NOTE 2: Valid types are L - actual stock item line (W/O quote only)
A - add on line (W/O quote only)
M - miscellaneous charge line (W/O quote only)
P - part line
T - actual segment totals record (W/O quote only)
Q - quoted segment totals record (W/O quote only)

NOTE 3: Possible values - W - work order quote line
P - part quote line

NOTE 4: This is a code that designates whether the quote segment is an estimate or a quote.
Q - segment is a quote
E - segment is an estimate

NOTE 5: The stock number of the equipment on the service quote.

NOTE 6: This is the make designation of either the equipment on the segment, if there is no job code, or the make associated with the job code.

NOTE 7: This is the model designation of either the equipment on this segment, if there is no job code, or the model associated with the job code.

NOTE 8: This is the machine serial number of the equipment on this segment.

NOTE 9: If the quote line is for a part, this will contain the part number.

NOTE 10: This is the job code for the work to be done on the service quote item.
If no job code is required, it could be blank, or "NA".

NOTE 11: This is the hourly rate code that is to be used for work on this quote segment.
It may be blank if a rate is manually entered.

NOTE 12: This is the hourly rate for work being done on this quote segment. This will default to the value associated with a rate code that is keyed, but it may be overridden.

NOTE 13: The extended labor hours for the quote item.

NOTE 1: This is the unique number that is assigned to a service or parts quote.

NOTE 2: This is the customer number associated with the service or parts quote.

NOTE 3: Avatax Parts Product Code

NOTE 4: The salesperson code that is associated with the quote.

NOTE 5: This is the date that the quote was created, in the format CCYYMMDD.

NOTE 6: This is the date that the quote was last modified, in the format CCYYMMDD.

NOTE 7: This is the quote expiry date, in the format CCYYMMDD. When adding a quote this will default to the current date plus the number of days set up in the control file.

NOTE 8: This is the date that the quote was first printed, in the format CCYYMMDD.

NOTE 9: This is the estimated start date of the work being done on the quote in the format CCYYMMDD.

NOTE 10: This is the estimated completion date of the work being done on the quote in the format CCYYMMDD.

NOTE 11: Possible values - W - Service quote
P - Parts quote

NOTE 12: Possible values - 042 - Service quote
043 - Parts quote

NOTE 13: This is the status indicator for the work order/parts quote.
Possible values - P - pending
Q - quoted
A - accepted

NOTE 14: The total amount of taxes on the quote.
